

## STAR ENERGY SERVICES JOB OPENING

### Senior Electrical Engineer (Full-Time, Exempt)

This position will be based out of an office located in southeast Minnesota, southwest Wisconsin, or northeast Iowa. The location is flexible based on the engineer's preference and work assignments. STAR's corporate headquarters are located in Alexandria, Minnesota, with another office located in La Crosse, Wisconsin.

STAR is a consulting firm providing services to rural electric cooperatives. These services include electrical engineering, inspection services, mapping, safety, electrical testing, computer technology, and software development. STAR has grown steadily since inception, from an employee count of 1 in 1997, to our current employee count of 35. With a quickly growing list of clients in Minnesota, Wisconsin, Iowa, and South Dakota, our revenue has grown annually to \$4.4 million in 2016.

A Professional Engineering license and a Bachelor's Degree in Electrical Engineering with Power Option are required. This position involves providing electrical engineering services to STAR's members and clients. Responsibilities include but are not limited to gathering and analyzing data, preparing various reports and studies, working with engineering models, power quality investigations, and making technical recommendations.

This position has an opportunity to become an Engineering Manager for a regional office based in southeast Minnesota, southwest Wisconsin, or northeast Iowa.

The broad range of services we offer requires our staff be self-motivated, detail-oriented, and highly organized. Our casual yet professional work environment encourages teamwork, innovation, and employee success. We offer competitive pay and an excellent benefits package. **Visit [www.star-energy.com](http://www.star-energy.com) for a detailed job description.**

Send resume and cover letter via email to [eee@star-energy.com](mailto:eee@star-energy.com).
